

Trellis National DPP Umbrella Hub Arrangement

Juniper, a program of Trellis, is one of the first umbrella hub arrangements (UHA) to support organizations that are providing the National Diabetes Prevention Program (DPP) lifestyle change program. Umbrella hub arrangements are designed to connect community-based organizations with health care payment systems to achieve sustainable reimbursement and increase program success.

Support

for meeting, maintaining, and reporting Diabetes Prevention Recognition Program (DPRP) requirements

Our secure on-line platform will hold your organization's required DPRP data. Data from Juniper's subsidiaries will be submitted and evaluated as one large group every six months. Combined subsidiary data reporting gives smaller organizations less worry and more flexibility to serve the minimum number of completers and maintain continuous programming throughout the entire year.

Ease of recruitment

and enrollment for your participants

Your National DPP classes will be listed on yourJuniper.org with 14 other evidence-based health promotion programs. You are sure to be seen because an average of 3,400 people visit Juniper's website per month. Adults interested in the National DPP will be screened and enrolled into your classes. Our easy system allows you to know exactly who is registered for your class in real time. All required participant data points for the DPRP will be asked at enrollment, allowing your coaches to start right away with doing what they do best - helping people make lifestyle changes - *not* doing paperwork.

Contracting for payment

from a variety of health care payers

Juniper is leveraging its network and subsidiaries to contract for payment for providing the National DPP. Juniper is working to set up contracts with Blue Cross Blue Shield, Health Partners, and other health care payers to receive payment from Minnesota Health Care Programs (Medicaid, Minnesota Care), Medicare, and commercial insurance. Juniper has been recognized by the Centers for Medicare and Medicaid Services (CMS) as a Medicare DPP Supplier. The potential revenue for each Medicare DPP participant is \$705.

Paying you

for the work you do

Not only will Juniper manage the payment contracts, but we will also submit the claims and ensure you get paid. Your administrative burden will be significantly reduced!

No initial cost

to our subsidiaries for at least the first year during our pilot phase

Thanks to support from the Centers for Disease Control and Prevention (CDC), National Association of Chronic Disease Directors (NACDD), and the Minnesota Department of Health (MDH), there is no cost for our pilot subsidiaries to participate in the UHA at this time.
